

I depend on the services and entertainment that XM radio provides. These same services and entertainment value simply are not available from commercial broadcast radio. Commercial AM and FM broadcast radio is a wasteland that will not be served by making laws to limit XM. Only the competition that is derived by providing a true competitor like XM will make the broadcasters come to their senses and start serving the public like they should. Please don't let them use you (the lawmakers) to protect them and keep them from the reality of a free market economy. They will never learn if you do their bidding for them. Please allow XM to flourish and to continue to truly serve the public by providing what we all want. I listen to CSPAN in my car on XM. How would I ever keep up with Washington on that level with broadcast radio?
